

prep week: git group task

The following exercise contains the following subjects:

- git and github collaboration
- practice BASH

Instructions

in this task you are a group of authors, writing a story together.

1. One of the group should create a new repo and add the rest of the team as collaborators.
2. The main creator should create 2 folders: story and authors.
3. Inside story, create a file called story.txt. This is where all team members will contribute their part to the story.
4. Each team member should create his/her own branch, and inside of it do 2 things:
 1. inside the author folder, create <your name>.txt file and populate it with your name and some details about yourselves.
 2. Add 2 lines of story to the story.txt file.
5. Each team member should commit his/her changes to the branch, and pull changes from the main branch. Resolve conflicts if there are any.
6. Open PR, and let the main creator approve it.
7. Send me the link to your teams repo.
